RE: ASBESTOS MATERIAL EQUIVALENTS

Please refer to your note requesting assistance to determine asbestos free materials which may be substituted for existing asbestos containing materials.

I understand that Mr. Mario Caprio, Pittsburgh Purchasing, is in the best position to help select asbestos free alternates. Please supply Mr. Caprio a complete listing of all asbestos containing materials currently stocked along with the major use of the item so that he may recommend substitutes. I suggest that you take a second look to be certain our list contains all asbestos-containing items.
