ASBESTOS DUST

Our MSA representative has just informed me that a recent NIOSH criteria statement will result in MSA withdrawing asbestos dust approval for their "Dustfoe 66" filter mask. This is the mask that we have just specified in our procedures.

MSA has recommended we adopt the Comfo II respirator in asbestos service and I'm forwarding information on these to Paul Richards. I would like to insert "Comfo II" in the Safety-How ..ocedure in place of "Dustfoe 66" and am holding the procedure until I hear from you. You will need to change your procedure also (issued 4/7/75) and initiate a stocking request for the Comfo II in place of the Dustfoe 66. (Cartridge filters F, S, or H are acceptable with F being the least expensive.)
