

UNITED STATES STEEL CORPORATION
AUTHORIZATION REQUEST
FOR CONSIDERATION OF EXECUTIVE MANAGEMENTPLAINTIFF'S
EXHIBIT
USX-279

1	TITLE - RETIRE AND DISMANTLE TWO TEMPER MILLS	
2	AUTHORIZATION NUMBER - E3-0269	TYPE - B
3	DIVISION - EASTERN STEEL	LOCATION - FAIRFIELD WORKS
4	<u>PRESENT CONDITIONS</u>	
5		
6	Fairfield Works has two 42" two-stand four-high temper mills which are no longer	
7	required for current product plan. The No. 4 Temper Mill has been idle since	
8	1965. The No. 1 DCR Mill (formerly No. 3 Temper Mill) has been idle since 1965.	
9	Fairfield Works has no need for these mills other than recoverable scrap.	
10		
11	Gary Works has requested portions of No. 1 DCR Mill and Irvin Works has requested	
12	portions of No. 4 Temper Mill. These requested components will be transferred	
13	upon approval of this request. The remaining equipment will be circularized to	
14	other USS plants. If no interest develops, the remaining portions of these	
15	mills will be dismantled and scrapped. Cost of dismantling equipment that is	
16	not currently scheduled to be transferred is estimated at \$90,000. Cost of	
17	restoring floors to safe and usable condition is estimated at \$30,000.	
18		
19	<u>PROPOSAL</u>	
20		
21	Retire the two idled 42" temper mills. Transfer portions of mills to other	
22	USS plants. Dismantle and dispose of remaining equipment when it is deemed	
23	economically feasible and in the best interest of the Corporation.	
24		
25	<u>BENEFITS ANTICIPATED</u>	
26		
27	Favorable disposition of surplus equipment.	
28		
29	<u>FINANCIAL EFFECT</u>	
30		
31	These facilities are no longer included in Fairfield's present state and local	
32	tax assessment.	
33		
34	Scrap value of equipment (less transfers to Gary and Irvin) is estimated at	
35	\$17,200 based on 300 tons at \$57.48 per net ton unprepared.
