May 17, 1976

Monsanto Industrial Chemicals Co.
Attention: Mr. Edward E. Stewart
Sauget, Illinois 62201

Dear Mr. Stewart:

We are presently planning our field schedule for the months of June-September, 1976.

In light of the renewed interest in polychlorinated biphenyl compounds at both the regional and national levels during the past calendar year, does Monsanto plan to recheck residue levels in the fishes of Choccolocco Creek and the Coosa River during the coming summer?

If so, we would be pleased if you would consider our group for the rechecking procedure.

Thank you very much for your consideration.

Very truly yours,

Gerald E. Gunning, Ph.D.
Biological Consultant
