STEEL RIVETS

It is strongly recommended that STEEL RIVETS be used in the mounting of METALLIC FRICTION PRODUCTS. A "Roll" type clinch should be used instead of the "Star" clinch commonly used with ordinary rivets. If a "Roll" clinch is not used, there is danger of small pieces of the rivets becoming loose, and damaging the friction material and scoring the opposing surfaces.

Rivet size can be determined by the part number as follows: B=5/16" Head, 3/16" Body; C=3/8" Head, 3/16" Body; D=1/2" Head, 1/4" Body; L=5/16" Head, 5/32" Body. The number represents the length by 16ths.

EXAMPLE: B– 8=5/16" Head, 3/16" Body, 1/2" (8/16) Length
B–19=3/8" Head, 3/16" Body, 1-3/16" (19/16) Length
