TOXICITY DATA - PYDRAUL F-9 & A-200

Your memo - September 7, 1966

T. Ishijima
TOKYO, JAPAN

Enclosed are copies of the toxicity study reports for subject compound. Please note that at the time of original work on A-200, the fluid was designated by its development number OS-95.

I have also enclosed information which we distribute widely in the United States regarding interpretation of the toxicity data and what we feel are the necessary handling precautions to use these products safely.
