INTER-DEPARTMENTAL MEMO.

Mr. E. A. Wells

I attach hereto a copy of a letter from Paul Klein received today. I do not think that I want to get involved in correspondence on this subject and wonder whether the best course of action would be to accept him offer to send over their "information/epidemiological" to talk about the studies mentioned. I can draft an answer to the letter and deal with all the points raised if you wish. I propose to send a photostatic of our "Brighten paper" to Dr. Klein. Please comment.

Mr. E. A. Wells
