PLAINTIFF'S EXHIBIT

UC-4742

To: L. E. Batiz

Copy to: [redacted]

Subject: No. 2 Olefins Demolition

At the request of Homer Decker an inspection of the furnace area was conducted on June 11th to determine if any asbestos remained in the area. There was no discernable asbestos material in the area. It is my recommendation that the area should no longer be treated as a regulated area.

Sincerely,

Kirk E. Martin
