FUL-COLOR (Revolutionary new velvet-flat wall and woodwork paint)

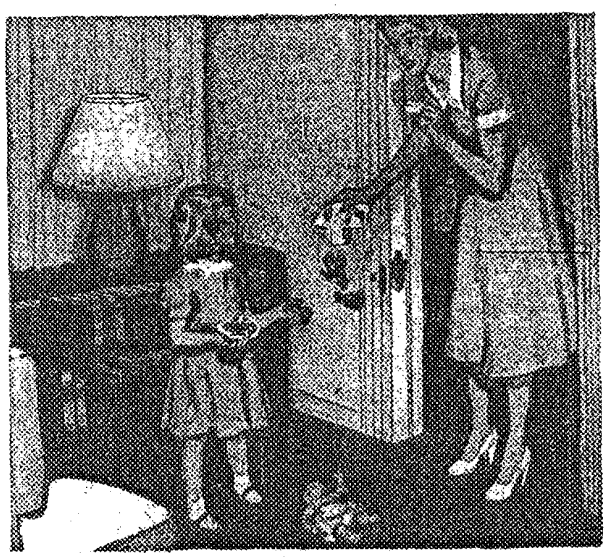
washes clean in a wink

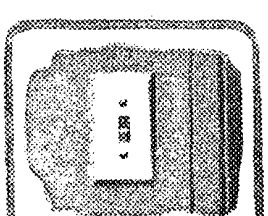
True, children should *not* make spots on your walls. But, no longer need you exclaim, "Look, you've simply *ruined* Mother's nice, clean wall!" No, not when your walls (or woodwork) are finished with FUL-COLOR—Fuller's NEW Latex-base interior paint.

Ful-Color washes *clean* with ordinary soap and water. Yes, all those usually so-hard-to-clean spots—oily finger prints, sugary deposits, lipstick, ink or grease—wipe off Ful-Color easily, quickly, almost effortlessly!

You see, as Ful-Color dries, its moisture *evaporates*, and its millions of Latex "beads" bind tightly together into a hard, smooth, *non-porous* surface that actually *resists* dirt. Non-porous Ful-Color gives dirt no place to cling—holds dirt ON its surface—not UNDER its surface.

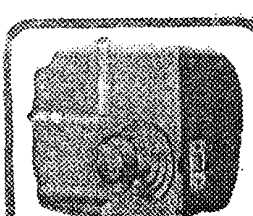
You'll like Ful-Color. It's a remarkable NEW KIND of interior finish—so easy to use, so quick to dry, so easy to keep clean, so velvet-lovely on walls *and* woodwork. Do try Ful-Color!





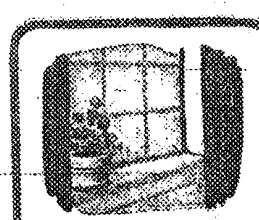
AROUND LIGHT SWITCHES

You reach for that switch by instinct—and *miss* it often! Result: greasy finger prints on the wall. On Ful-Colored walls they'll wipe off with a damp cloth—easily, quickly, completely!



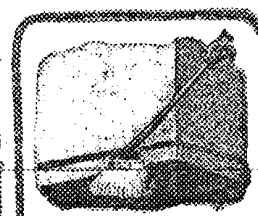
ALONG DOOR EDGES

Doorknobs are not used as much as you think. Door *edges* take the soil! Ful-Color flat paint washes clean in a wink—makes clean doors a rule, despite careless hands. Good housekeeping!



ON WINDOW SILLS

Air-borne dirt settles on sills. Neglected, it forms an unsightly crust! Ful-Colored sills will clean instantly with just soap and water—stay clean with so little effort on your part.



BASEBOARDS, TOO

Despite your care, waxing and polishing mops *do* leave marks on baseboards. *Non-porous* Ful-Color holds this wax ON its surface—easy to reach—easier for you to wipe away.

FULLER PAINTS

They Last

Everything you've ever wanted in a flat interior paint
