ALERT - AROCLOR 5460
AND AROCLOR 1221

H. S. Bergen - B2SA
[redacted]. Mason - B2SA
W. B. Papageorge - B2NK
J. E. Springgate - B2SA
E. P. Wheeler - A2SA

M. W. Farrar - 1760

The FDA is asking for 5-lb. quantities of Aroclor 5460 and Aroclor 1221 through Aroclor 1262 for feeding studies and teratogenic testing. EPA has also asked for Aroclor 1221, Aroclor 5060 and Aroclor 5460!

This is a clear signal that the chlorinated terphenyl Aroclor 5460 is on "the target list". Replacement products are indicated unless you gentlementhink that the above compounds will be medically acceptable.
