20170501 EPA RIN Value Pass Through POO Moved Rev 7.pptx

Mandy and Samantha,

Also, as a follow up to last week's meeting (Samantha, we will bring this with us next week to review as well) Dave put together similar charts but as though the point of obligation would have been moved. Hopefully you find these helpful and if you need any additional clarification on any of the slides, please let us know.

Mike

I am available to meet on the 9th after 11am. Thanks! How much time do you think we will need?

Mandy, thank you for making the connection, and we are happy to provide you the fuels briefing again.

Samantha, we are happy to help you pull together all of that information and the briefings. We actually have Dave Whikehart, our VP of Environment, Safety and Corporate Affairs, returning to town next week on the 9th. Are you both available on the 9th? If you are, maybe we roll all these into one meeting. Samantha, at worst we can have Dave stop in to go through the RIN and RIN value flow charts with you since you were not able to join us last week.

If the 9th does not work, please let me know a few other dates that work for you both and we can try to get everyone here so we are maximizing your time.

Thanks!

Mike

Mike,

I want to connect you with Samantha Dravis (cc'd) who heads up our Office of Policy. She is interested in learning about MPCs operations, an overview of fuel logistics (i.e. Fred's briefing), an inside look at your HQ operations and getting the briefing you provided last week with particular emphasis on the RIN and RIN Value flow charts. Selfishly, I'd be interested in getting the fuels briefing again.

Samantha,

Mike is a good friend and one of the best lobbyists in town. He will set you up with whatever you need.

Best,
Mandy
