Dr. Robert Kehoe
Box 61
Aspen, Colorado

Dear Dr. Kehoe:

I am assuming that you have received my wire of the 4th, mentioning the difficulty in Savannah Georgia. As I have not heard from you, I also assume that you have decided that any action on your part is not at this time required. I am glad that you feel this way about it because I was particularly anxious that your vacation should not be interfered with, in as much as I feel that everything has been done that could be done under the circumstances. Feeling, however, that you are more than likely interested in knowing more of the details of the affair, I am enclosing copy of a letter which I addressed to Mr. O. B. Lewis, giving a brief resume of our knowledge of, and action in the matter. Undoubtedly there will be developments in these cases which will require your personal attention, but this will most certainly come at a much later date. I regret exceedingly the occurrence of these cases and feel that it is probably the most unfortunate affair which has developed since your association with the Ethyl Gasoline Corporation. It is rather obvious, however, that the responsibility rests entirely with the Standard Oil Company since we surely have made every effort to impress on the refineries the necessity for strict precautions in the tank cleaning operation.

I am hoping that you have a very pleasant vacation and that this affair has not interfered in the least with your enjoyment.

Sincerely yours,

L. W. Sanders, M. D.
