December 27, 1977

Dear Mr. Larkin:

Roebuck Systems, Inc. was founded March 2, 1977 for the purpose of offering a thermal oxidizing service for liquid wastes. The service will be initially concentrated in the Southeast, but inquiries from other areas of the country will be welcomed.

The target date for the start-up of operations is February 1, 1978. We will concentrate initially on the handling of bulk liquid wastes; however, we will be willing to discuss drummed wastes and determine how best they can be handled. We will require inbound quality control analysis for each shipment. Roebuck Systems will, in turn, analyze wastes upon arrival at the Roebuck plant.

After completion of the oxidation process, Roebuck Systems will issue a corporate certificate to the customer stating that the waste material was thermally oxidized in compliance with Federal, State, and Local rules and regulations.

Roebuck Systems will offer a pick-up service for bulk shipments, unless it is more economical to call on common carriers.

The thermal oxidation service is summarized in the attachment to this letter. We invite your inquiries about our new program and feel that we will be offering a very valuable service which deserves your attention.

We look forward to hearing from you.

Sincerely yours,

ROEBUCK SYSTEMS, INC.

Charles O. Milford
Vice-President, Operations
