Q And it was not a cohort study?
A That is correct.
Q Okay. Now, with respect to the Marcus study from Sweden, if I remember correctly from when it was on the overhead, that was the study that was talking about basically asbestosis and things of that nature?
A It talked about pleural plaques.
Q Right.
A And, excuse me, it talked about the presence of asbestosis in something on the order of seven out of 24 individuals whose X-rays were studied.
Q In addition, did it also look at pulmonary function tests?
A I believe it did.
Q Okay. So that study as well did not involve mesothelioma, correct?
A That is correct.
Q Then you talked about the Australia Mesothelioma Registry, if I remember correctly?
A Right.
Q That wasn't a study at all; that was a
