J. L. E. HILL - Nemours
G. T. ESRY - Nemours

ASBESTOS SEMINAR

After reviewing the notes of this meeting, I have decided that the handouts and the following items will suffice to record the discussion.

1. A copy of Dr. John Foderaro's talk. A copy is attached.

2. A revised Textile Fibers guideline. This will be developed as a result of your comments and will be issued for your review in about a month.

3. Developmental of answers for the following questions:

   a. Should only plant doctors read chart X rays?
   b. When should respirators be worn? — address
   c. How do you notify an employee who is overexposed?
