To Gilbert B. Meyers, M.D. Address BR Tower

From Carl B. Myers, M.D. Address BR Plant

Subject Asbestos 790108 (Ethyl Corporation Medical Department) Date January 15, 1979

Invited comments:

ELIGIBILITY

Numbers 1 & 2 -- What is "potentially significant asbestos exposure"? Define.

EXAMINATION INTERVAL

1. Cigarette smokers of 6-12 months. Should we look at all smokers at this interval?

3. On what basis was the decrease of FVC less than 80% or FEV_1 less than 70% derived?

   What criteria determines if an employee be removed from further exposure?

   May an employee be exposed if proper respiratory equipment issued and worn?

   Would it be appropriate to include present and/or proposed standards (TWA) as a matter of info? (Why this Asbestos 790108 is being implemented, in other words?)
