Project Rules and Regulations
NIACHLOR Project
Niagara Falls, New York

These Project Rules and Regulations are set forth as provided under Article 15, Section 15-9, of the Caustic Chlorine Project Stabilization Agreement with the Niagara County Building and Construction Trades Council and other signatory Building Trades local unions.

PARKING

Owner will designate parking areas for contractor employees' vehicles, gate location and access route to the construction area. Contractor's personnel will be restricted to their work area and to the prescribed route for walking to and from the parking areas.

ENTERING AND LEAVING THE PROJECT

Access to the plant will be through designated construction gates only. Except for delivery of materials, only one company-owned vehicle will be permitted on site. Plant speed limit of 10 mph must be observed. Safety glasses must be worn by everyone inside a vehicle cab. Only supervisory personnel and material handling employees will be allowed to use vehicles. Safety glasses with side shields must be worn between the entrance gate and the work site. All trucks, personnel (including their lunch buckets) and materials leaving the plant will be subject to inspection or a material pass will be required.

All visitors to the project must be cleared by the Owner prior to entering the construction area. Visitors must comply with the Owner's safety and security rules. If required, arrangements for escorts will be made by the Owner.
