

October 11, 1950.

Dr. C. E. Warwick,
Executive Director,
National Cancer Institute of Canada,
280 Bloor St., West,
Toronto 5, Ont.

Dear Harold:-

Thank you very much for your letter of October 19th advising me that you and Dr. Phillips will be in Montreal on Sunday, November 12th. I have delayed answering this for a few days for I have tried to contact Dr. Paul Cartier of Thorford Mines who also is interested in our cancer problem. He has just advised me that he will be available on that day, so we shall look forward to a very interesting meeting.

Could you please tell me where we may contact you and Dr. Phillips in Montreal? We shall keep the whole day free so that we may be at your disposal to fit in with any other plans you may have.

I believe that our industry has just approved a long range research program of which the statistical study is the foundation. This news reached me this morning and as yet I am unaware of the details or how many thousand dollars per year they expect to spend. I should know all this before we meet on the 12th.

With sincere personal regards, I am,

Very truly yours,

Kenneth W. Smith, M.D.
