E. P. Wheeler - St. Louis

August 23, 1968

ARCOLOR/ECOLOGY

Dr. W. R. Richard
Mr. Scott Tucker - Queeny Plant
Mr. M. S. McCauley - Washington

Mr. J. D. Early - Washington

Confirming the message I left with Matt McCauley this morning, we would appreciate it if you would try to set up appointments on Wednesday, September 4 for the following:

Dr. A. R. Cleeper, Jr.
Chief, Pesticides Reference Standards Section
Pesticides Branch
Division of Food Chemistry & Technology
Food and Drug Administration
Washington, D. C. 20204

W. N. Blickenstaff
Chemist in Charge
Pesticides Regulation Division
U. S. Department of Agriculture
101 South Laboratory Building, A.R.C.
Beltsville, Maryland 20705

You will recall that these two gentlemen requested and have been provided samples of various Aroclors we believe they wanted in connection with Swedish and British reports of finding Aroclors in trace quantities in fish and wildlife. Scott Tucker and I would like to visit these gentlemen with you to determine what they are doing and what they are finding.

Our files do not indicate that other federal agencies in Washington have requested samples although we do know that some of the regional laboratories of the water pollution control agencies are making investigations. I will check with you and Bill Richards by phone Monday to see if there are others in Washington that we ought to visit.

Alternate dates include Thursday, September 5 and September 10 through September 13.

Elmer P. Wheeler
