FROM ANNISTON, ALABAMA

DATE February 4, 1969

SUBJECT Aroclor 5460 - FDA Approval

REFERENCE J.C.L. memo 12/13/68

TO W. A. Kuhn

cc: V. R. Haupt
G. W. Miller
C. Paton
H. L. Williams
R. M. Kountz

The second commitment of referenced memorandum has been completed with the result that we can realize 0.10% or less biphenyl in S/W C by adjusting the biphenyl still bottoms temperature upward as necessary. Further work will be done to 1) determine adjustment necessary as BiØ/SW ratio changes (test was run on 85/15 ratio) 2) determine how much less than 0.10% can be consistently realized by long term running at conditions to minimize S/W C biphenyl without adversely effecting overhead quality.
