E. P. [illegible]

December [illegible]

Aroclors [illegible]
Discussion [illegible]

W. R. Richard [illegible]
[illegible]

I believe [illegible]
Friday [illegible]

1) Dr. Calandra [illegible] to make available [illegible] for analysis by [illegible]
The doses to be used [illegible]
Appropriate tissues and organs will be [illegible]
to St. Louis for analysis. This is intended to yield [illegible]
gross [illegible]

2. Dr. Calandra [illegible]
studies [illegible]
been [illegible]
will be [illegible]
analysis [illegible]
provide [illegible]
and/or [illegible]
analysis [illegible]

3) It is [illegible]
could be initiated soon after completion of the [illegible]
within the next 60 to 90 days. This is not [illegible]
however, to begin the two-year studies at that [illegible]

4) The actual preparation of "hot" material is [illegible]
abeyance but exploration as to the availability [illegible]
tagged material is to be continued and [illegible]

5) The [illegible] of determining [illegible]
of isolating [illegible] for fractions [illegible]
be studied [illegible]

6) It would [illegible]
animal [illegible]
and analytical [illegible]
already [illegible]
appropriate [illegible]
chlorinated [illegible]
I have [illegible]
which [illegible]
lubricant [illegible]

7) Analytical work should be initiated to determine the decomposition products when representative materials (paper) containing Aroclor are burned.

8) There should be follow-up with the fish and wildlife people at Patuxent with a request for duplicate samples of some of the tissues in which they have identified PCBs so that Scott can attempt to confirm their results.

9) There should be further discussions initiated with Risebrough and others around the country whom we have not yet contacted but who we believe to be actively engaged in research projects looking for the PCBs.

10) It was deemed advisable to arrange more formal [illegible] correlation and analysis of all of the publications and [illegible] of information which are available. [illegible] possibly statistical analysis [illegible] biological and biochemical background as well as statistical analysis capability.

11) It was the consensus that the group should [illegible] monthly meetings to review progress. The first [illegible] was tentatively scheduled for January 15 at Dr. [illegible] Laboratories in Chicago.
