Dear Sir:

I appreciate this opportunity to briefly describe a new service which we are offering to help you solve many of your waste disposal problems.

Our firm was permitted by Mr. Alfred S. Chipley, Director, Solid Waste and Vector Control, Environmental Health Administration, Alabama Department of Public Health on May 4, 1977 to construct and operate a hazardous waste disposal facility in Sumter County, Alabama. This is the first such permitted facility of its kind in the state.

Our permit allows us to accept broad categories of wastes not suitable for normal landfill operations. Our permit reads ".... shall be for the disposal of all solids and liquids catagorized as potentially hazardous or toxic, except radioactive wastes and except normal domestic and commercial wastes...."

Our services will include landfill disposal for solid wastes and incineration disposal for liquid wastes. We will accept your wastes either on your transportation equipment, common carrier, or ours.

Stringent requirements of monitoring, maintenance, and testing will be complied with, in order that the environment will be protected. The State Health Department will constantly monitor our activities.

Thank you for your consideration and please contact me at the address or telephone shown below if you desire additional information.

Sincerely,

James T. Parsons
