Mr. C. W. Biederman
Reynolds Metals Company
P.O. Box 520
Arkadelphia, Arkansas 71923

Dear Mr. Biederman:

In accordance with your request of today, I enclose a memorandum I had previously written that describes the monitoring and analysis equipment used in the membrane filter/personal air sampler method of evaluating asbestos fiber dust levels.

A more complete description of the equipment and the procedure may be found in a pamphlet entitled "Sampling and Evaluating Airborne Asbestos Dust", dated January 1973 and published by:

The Division of Training
National Institute for Occupational Safety & Health
U.S. Department of Health, Education & Welfare
Health Services & Mental Health Administration
Cincinnati, Ohio 45202.

Very truly yours,

Edmund M. Fenner
