Further to our discussion this morning please note that we have firm instructions from T&N that "Dr. Lewinsohn should on no account be allowed access to any T&N facility or be given further information as to our Asbestos and Health experience".

I now know that Dr. Lewinsohn has had to cancel his proposed visit during late January '79 so that you are saved the embarrassment of having to defer the visit from this end.

I have advised Mr. Atkinson at T&N that you will not undertake any exchanges with Dr. Lewinsohn on Asbestos and Health matters without prior approval from Mr. Atkinson.
