INTER-OFFICE CORRESPONDENCE

Industrial BIO-TEST Laboratories, Inc.

FROM: JP

DATE: March 19, 1969

TO: MLK

SUBJECT: Aroclor Tissue Residue Studies - B7009 & J7010 - Monsanto

All of the rat tissues, except those from Aroclor 5460 (300 and 1,000 ppm) and Halowax 1014 (100 ppm), will be shipped to Dr. Scott Tucker at Monsanto on March 20, 1969. The remaining tissues will be sent on April 3, 1969.

During the course of my conversation with Dr. Tucker, he expressed a strong desire to have the chicken tissues as soon as possible. I contacted Don Jenkins and he will send the available chicken tissues (4 Aroclors) via air express to O'Hare Field tonight. These tissues will be picked up and shipped with the rat tissues tomorrow morning.
