Professor E. L. Delvaux
Universite Catholique DeLouvain
Faculte Des Sciences Economiques
Leo Dartelaan 27
3030 Heverlee (Bt), Belgium

Dear Dr. Delvaux:

We are glad to hear that you received our samples of Aroclor. We have continued our work on polychlorinated biphenyls to the point where we have a written gas chromatographic procedure for the analysis of water and sediment. A copy of this method (69-13) is enclosed.

Monsanto Company Technical Bulletin No. PL 306 (1960) is currently out of print. A revised bulletin is being prepared for issuance within several months. We will send you a copy, as requested, when it becomes available again.

Please let us know if we can be of further assistance.

Sincerely,

Robert E. Keller
Manager of Applied Sciences
