
longer life span

Metal surfaces that must resist outdoor exposure—weather, water, acids, alkalis and other corrosive influences—*have a longer life span* when they are regularly protected with maintenance paints formulated with Monsanto AROCLORS.

The AROCLORS (*chlorinated* biphenyl and chlorinated polyphenyls) are widely used by manufacturers of modified and synthetic rubber coatings and in lacquers, hot-melt strip coatings, maintenance paints, fire-resistant coatings, wood-sealer formulations and marine paints.

AROCLORS

Learn more about the protective qualities of the AROCLORS . . . Write MONSANTO CHEMICAL COMPANY, Phosphate Division, 1700 S. Second St., St. Louis 4, Mo.

AROCLOR: Reg. U. S. Pat. Off.
