DIRT AND GRIME don't cling to exterior surfaces finished with Du Pont House Paint. The rains just wash them away . . . leaving the paint clean and new-looking . . . saving repainting bills!

Self-Cleaning Du Pont House Paint contains titanium dioxide, the pigment that's whiter than snow. It is so formulated that, as time goes by, a microscopically fine white powder forms on the surface. Heavy rains wash the powder away, taking dust and dirt with it and leaving the surface clean and white again. Excessive accumulations of dirt (particularly in sooty industrial communities or in heavily shaded locations) and stains from copper screens may delay or interfere with this process. Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

Available in white and popular tints, Self-Cleaning Du Pont House Paint is as durable as it is beautiful. It protects against rust, rot and decay—gives lasting beauty and protection. Yet it costs no more than other good paints. Call on a reliable painter for your painting jobs. He'll be glad to use Du Pont House Paint.

Note: *Due to raw material shortages, your dealer may be out of Du Pont House Paint temporarily. However, it's worth waiting for.*
