(Location)

TO: D. E. Dudrow
J. D. Forbes, M. D.

FROM: L. F. Dieringer

DATE: June 21, 1973

SUBJECT: OSHA Asbestos Standard Compliance Meeting, Hogansville

In attendance at this meeting at 9:00 a.m. on June 20, 1973 were the following:

W. Bittinger, Divisional Engineering, TAC Winnsboro
E. Morris, Asbestos Product Sales Manager, TAC Winnsboro
L. Dieringer, Oxford
R. Hunt, Factory Manager, Hogansville
B. Carden, Overseer, Asbeston Plant, Hogansville
R. Sprayberry, Industrial Relation Manager, Hogansville
B. Philpot, Plant Engineer, Hogansville
C. Owens, Supervisor, Asbeston Plant, Hogansville
R. Briggs, Process Engineer, Hogansville
T. Austin, Development, Hogansville

The meeting centered around developing implementation dates for the projects and procedures listed in the attached letter of June 15, 1973 from Mr. R. Bittinger to Mr. R. C. Hunt. Mr. Bittinger who both chaired the meeting and took minutes, will send a copy of the minutes in several days. I have penciled in brief notes on responsibilities and tenative completion dates on the attached letter.

This meeting in a sense was a mirror image of the meeting of July 26, 1972, and as aptly stated by one, "we are in the same position as we were at that date, with little progress having been made".

The plant has grudgingly consented to use of respirators, protective clothing and posting in blending and carding, but as before wants more sampling before implementing on September 1, 1973. We continue to be in violation in these and other areas of the standard.

Mr. Bittinger indicated he will go to Messers. Sigler and Boulware if hang-ups develop.
