Summary

CONFIDENTIAL

JULY 1971

Read and destroy

AROCLOR WASTES

Current Level

Aroclor losses during July '71 averaged 2.14 lbs./day (240 ppb). Breakdown of numbers are:

Normal level	140 ppb	1.24 lbs./day
Ruptured Muriatic Acid tank	45	0.40
Excessive rain	55	0.50
Totals	240 ppb	2.14 lbs./day

The month of July had an unusual amount of intermittant rain which may have caused the normal level to go above 1.0 lb./day. Since our flow measurement is one/day, it would not pick up the occasional cloudbursts.

Spills

Less than 10 gallons when Montar drawout line unplugged. No evidence of getting past the department sump pit.

J. R. Haupt
