Within a short time we will have to comply with a requirement in the OSHA asbestos regulations calling for caution labels to be attached to such items as scrap, waste and debris, ostensibly bagged and ready for disposal. These labels shall read:

CAUTION
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
Breathing Asbestos Dust May cause
Serious Bodily Harm

Jack Lunsford can provide a supply of these tags in about six weeks. They would then be made a stock item.

Can you let me know if you have any preference in the matter of color of these tags. Do you want red, yellow, or is white okay?

Also, don't ask me whether we tag un-bagged scrap asbestos such as remains on piping or equipment or in D.D. boxes sent to our own disposal area. I don't know at this time.

cc: F. P. Turk
