Subject EMPTY ASBESTOS FIBRE BAGS

Thank you for your letter of April 2nd on the above subject. Due to the chaotic conditions of the burlap market, which seems to be going from bad to worse, during the past six months, we are finding it difficult to purchase good used bags at any price, and any assistance you can give us will certainly be appreciated.

We can use 7½ or 8 ounce burlap bags in 28 x 40 or 30 x 40 finished sizes, either plain or printed. Small patches are not objectionable. It is very important however, that such bags be vacuum cleaned and absolutely free from all foreign materials such as grain, wood, etc., which might contaminate asbestos fibre.

K. A. Foster
