NOTE TO FILE

SUBJECT: AROCLOR

In a recent recap of state labeling laws governing chlorinated hydrocarbons for PYDRAULS and AROCLORS it was agreed that the laws state that the labels shall carry the chemical or generic name and not the trade name only.

AROCLOR is trans-shipped by many of our customers and they do not want our label on the container, so a small black and white label that can be covered easily or removed altogether is used.

If we ever begin using our Monsanto product label we should include the statement, "A Chlorinated Diphenyl--Technical".
