Gulf Lab Road
P.O. Box 300
Cheswick, PA 15024

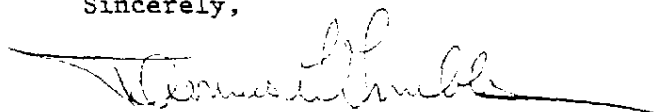

Dear Howard:

I have reviewed our outside analytical needs with our manufacturing sites. We do very little analytical outside of the plants. Environmental needs include low level PCB analysis and GCMS analysis on wastewater streams. These are done on an as needed basis only and are by no means routine enough to quantify needs.

Due to the nature of contaminants sampled in most of our industrial hygiene programs, our analytical is almost totally in-house. For example, methyl chloride, ethylene oxide, and vinyl chloride samples do not "travel" well and are done in-house to assure accuracy.

Please keep me informed as your laboratory services develop and we would consider your lab for the analytical services we do need.

Sincerely,

Thomas G. Grumbles, CIH
Environmental Quality Manager
