SUBJECT: PCB Epidemiology Study

REFERENCE:

TO Jay R. G. Ortiz-E2NE

Attached is a revised draft of the proposal for the DMEH study. Dr. Meyer and I have attempted to follow up on your suggestions, and once again we invite any further remarks and/or criticisms.

A further note with regard to the progress of the PCB study - we hope to obtain a computer analysis of the study population by the end of this week. The rough draft of the study and our interpretations of its results is projected to be completed by Friday, August 25.
