SUBJECT : File Retention

REFERENCE :

TO : W. B. Papageorge

Due to the previous and imminent move in May, we have been going through the PCB files. Contents of the file have been reduced significantly, and currently there are approximately four file drawers of material. There is some small quantity of material stored for distribution such as PCB labels and copies of the Monsanto PCB position paper booklet. As of this date, my files are in compliance with File Retention Regulations.
