Carp	3.8	0.1
	2.3	0.3
	1.7	0.2
	1.4	0.1

Task Force Comparison

1. Fish taken from 47 of 50 sampling stations in 1969 ranged from < 0.1 to 15 ppm.
2. Of 40 fish analyzed from several rivers in 1970, the top 20 averaged 36 ppm with range of 10 to 213 ppm. Only 1 of the 40 was < 1 ppm.
3. Samples from 317 fish taken from 13 metropolitan areas (not St. Louis) taken from Nov., 1969 to June, 1971, were in the general range of 1 to 10 ppm. Varied from trace quantities to 35 ppm.
4. Catfish from commercial fish farms at 3 ppm.
