St. Louis, Missouri

January 9, 1957

Mr. G. R. Sido

Washington, D. C.

I plan to be in Washington on January 23. Dr. Treon will likewise be there. Could you arrange for us to see Commander Siegel to talk over the details of the Naval Medical Research tests on Pydraul 150. As I understand it, we have a standing invitation (extended by Commander Siegel to Mr. Wheeler) to come out and see their laboratory.

I have already written to Lehman for an appointment on some things from Springfield, and I can take care of Jaworski's letter on Randox at the same time.

R. Emmet Kelly, M.D.
