It is important that we now make firm plans on the recovery and/or disposal of used products. Will each of you plan to be present in B-303 at 9:00 A.M., Thursday, March 4, for this purpose.

Important issues to resolve will include waste incineration and total fluids reclamation requirements, individual and customer actions required ahead.

A proposed agenda is attached.

In the several days ahead please give particular thought to fluid and solids volume requirements, customer approach and Monsanto actions to meet the disposal/recovery need.

If there are agenda changes or a conflict in meeting time please let me know.

D. R. Pogue

AGENDA

Handling and Disposal

a) incineration capacity versus demand

b) drum use and return

Reclamation versus Disposal

a) Liquid-Solid requirements

dielectric fluids
heat transfer
hydraulics

b) Industrial Fluids Reclamation Program

status
requirements for total approach including dielectric and Therminol needs.

Future Actions

a) Group responsibilities

b) Customer approach
