

TO Dr. P.A. Lobo AT Saddle Brook DATE June 16, 1976

FROM J.P. Sandstedt AT Burlington COPY TO D. Coldiron
R.S. Miller
W. Miringoff
J.W. Poarch

SUBJECT PILOT SCREENING OF DIAMOND SHAMROCK
VCM STRIPPING TECHNOLOGY

This will confirm our telephone conversation concerning our interest in pilot testing of Diamond technology with our latex. You indicated such a test could be scheduled in about four (4) weeks.

Further information required to move forward includes:

1. Location of test
2. Quantity of latex per trial
3. Cost, if any
4. Right to observe
5. Other arrangements as may be necessary

Please advise if any of this information is available. If not, perhaps I could contact Diamond directly.

J.P. Sandstedt

JPS:nt

*Diamond wishes to call me when
pilot unit is free - I understand that
Diamond's latex is "quite" stable from
a former Diamond employee - this I
suspect their treatment may be
too severe for us.
