51. A microcomputer-based data acquisition and analysis system for CO_2 rebreathing studies. M.A. Goegelman, B.G. Min, D.R. Donchin, W. Welkowitz, T.V. Santiago and N.H. Edelman, Proc. 30th ACEMB.

52. Brain blood flow and ventilation during euoxic and hypoxic sleep. T.V. Santiago, E. Guerra, A.K. Sinha and N.H. Edelman, Clin. Res. 28:431A, 1980.

53. Hypoxic arousal in sleeping cats. J.A. Neubauer, T.V. Santiago and N.H. Edelman, Amer. Rev. Resp. Dis. 121(4, pt II):383, 1980.

54. Endorphins and control of breathing: Naloxone reverses the impaired flow-resistive load compensation in COPD. T.V. Santiago, C. Remolina, V. Scoles and N.H. Edelman, Amer. Rev. Resp. Dis. 123(4, pt II):211, 1981.

55. Regional brain blood flow during isocapnic hyperpnea induced by simulated exercise. J.A. Neubauer, D.A. Strumpf and N.H. Edelman, Fed. Proc. 40(3, pt I):567, 1981.

56. Effect of six weeks of protein deprivation on rat lung. J.S. Kerr, S. Lanza-Jacoby, D.J. Riley, R.A. Berg, N.H. Edelman and D.J. Prockop, Fed. Proc. 40(3, pt I):592, 1981.

57. Oxygen toxicity produces alveolar overdistension which progresses to emphysema. D.J. Riley, M.J. Kramer, J.S. Kerr, R.A. Berg, B.D. Ianni, N.H. Edelman and D.J. Prockop, Fed. Proc. 40(3, pt I):767, 1981.

58. Beta-aminopropionitrile administration prevents lung mechanical changes and increased lung collagen content in the bleomycin-treated hamster. D.J. Riley, J.S. Kerr, R.A. Berg, B.D. Ianni, N.H. Edelman and D.J. Prockop, Amer. Rev. Resp. Dis. 123:221, 1981.

59. Beta-aminopropionitrile administration inhibits lung collagen accumulation produced by oxygen toxicity in the rat. D.J. Riley, M.J. Kramer, J.S. Kerr, R.A. Berg, B.D. Ianni, N.H. Edelman and D.J. Prockop, Clin. Res. 29:451A, 1981.
