C. B. Hopper Chicago Lead Regulations

Stickers with appropriate warnings to meet the Chicago regulation should be available shortly. Chicago will allow us to apply these to the lids but we must specify the specific metal on the warning. Some items may require two stickers.

I understand Mr. Hurdelbrink has indicated that he still needs a list of products that do not comply. Please furnish whatever is required.

As I see it, we need:

(1) A list of non-complying interior products (other than varnishes, stains, aerosols and porch and floor). Include interior-exterior products and exterior products where a definite recommendation for interior usage is made. These products should be removed from Chicago by July 1.

(2) A list of remaining interior products (varnishes, stains, aerosols, porch and floor) which should be removed from Chicago by January 1, 1973. Perhaps a concerted effort should be made to sell these.

Items with a filling suffix "X" comply and are not to be removed.

(3) A list of items which require stickering unless they have a filling suffix "X".

The factory should not ship items on list (1) or (2) into Chicago unless they have a filling suffix "X", and should ship "X" items of list (3) if they are available.

The computer print-out of all non-complying items produced at Martin-Senour, which I furnished some months ago, should be a reasonably good source for the preparation of these lists.

If I can help you any further, please advise.
