MEMO TO H. S. Bergen
W. R. Corey 2/18/73

Admittedly this is a summary "after the fact" but perhaps it is useful. I believe the benefits derived from the effort that went into this compilation should occur in the coming years because our Medical Department is now fully aware that accurate records and control are necessary for the proper management of this activity. The Medical Department has revised its procedure and has offered to publish quarterly status reports. I intend to make sure that we get the reports.
