E. P. Wheeler - EWHEE

Mr. E. L. Raab
General Electric Company
Pittsfield, Massachusetts

Mr. E. L. Raab, Manager of Insulation Systems, General Electric Company, Pittsfield, Massachusetts, through knowledge about the biological reports pertaining to Aroclor found in wild life, induced his acquaintances at the Denver Research Institute to present to us their facilities for studies in these areas.

As you well know, General Electric are the largest user of Aroclo dielectrics.

Enclosed is a letter from the Denver Research Institute and their brochure describing their organization and facilities.

Please respond to Dr. John A. Young. Thank you.

P. G. Benigaus
