Supplement to Contract
with Kam-Tech Laboratories

PERSONAL & CONFIDENTIAL

Mr. F. C. Walters

Purchasing Department

Dear Mr. Walters: Attention: Mr. B. F. Anderson

When the new Hydroformer begins operation there is a small possibility that some problems may arise from contamination of the soil in surrounding areas with molybdenum from catalyst discharged to the air. We have decided to undertake a program of soil and foliage analyses to follow this problem. The program will extend over a period of three years and will include five sets of samples of soil and foliage to be taken at fifteen designated points. Analyses for copper and molybdenum will be made on each sample. The work will be done by Kam-Tech Laboratories. They have submitted an outline of the methods to be used and have quoted a price of $1,000.00 for each set of samples. The first set is to be taken during the month of December, 1954. Copies of the detailed procedures have been forwarded to your office.

Please prepare an addition to our present contract with Kam-Tech Laboratories in the amount of $1,000.00, to cover the cost of taking and analyzing the first set of samples.

Yours very truly,

D. O. SWAN
