SUBJECT POLYCHLORINATED BIPHENYLS

REFERENCE

TO Dr. Cumming Paton,
ST. LOUIS

~~Xerox~~ B881X

~~SWBP phone handle.~~

The Government Chemical Laboratories in Western Australia have been asked to examine certain foods with the object of ascertaining if trace amounts of polychlorinated biphenyl are present.

We have been approached by this Department to provide a small sample of pure polychlorinated biphenyl and a method of anaylsis for determining the presence of PCB in foods by gas chromatography.

Would you please let me know what the official Company attitude is to meeting such a request.
