

Junio 6 de 1.940.-

Dr. Prof.-
Robert A. Kehoe.-
Cincinnati.-

Dear Doctor Kehoe:

Many thanks for your letter of april
the 16th.-

I have just examined the men for the Carri-
pito plant. There are two people who work in
a so-called "Doctor sweating process", with
a solution of caustic soda and lead oxide. At
the same time they will do one or two mixing
operations a month.-

May be employed the two men for both the
"Doctor sweating process" and the mixing
of ethyl fluid and gasoline without danger.-
Mr. Risso-Gill, Mr. Roberts' s partner asked
me to write to you and have your advice about
this matter.-

Yours very truly

P. L. L. L.

Dr. Carlos Ottolina.-
