PRECAUTIONARY LABELS ON CHLORINATED DIPHENYL

RMK to PEH 1/8/58

Confirming our discussion on the above subject the Production department will assume responsibility of precautionary labeling of all drummed Aroclors. This will not apply to Pyranol or Inerteen products as recommended by Dr. Kelly.

Please make arrangements to supply production with about 10,000 labels of the "come clean" type which reads: "Caution avoid prolonged and repeated contact with the skin - Avoid prolonged breathing of vapor and fumes".
