Subject Vinyl Chloride Departments at
Loc. 514 and Loc. 512

Dear John:

Attached is a list of all departments that handled vinyl chloride at South Charleston and Institute from the 1930's to present. Would you please verify its completeness and accuracy i.e., should departments M4N and MN at South Charleston be included?

Thank you, John.

Sincerely,

Susan

ASK JC.

*Susan,
Why are dept's
307 + 327 listed
twice under Vinyl Chloride
and Solvent Vinyl Chloride
The Table is set up to differentiate
between Manufacturing and User
Departments - according to the
Dictionary and Project books
M7N should appear as a Manufacturing
dept. when it appears under the VC dept. -
307 and 327 are other 20 codes for
the Manufacturing dept. -
closed out in 1951.*
