December 15, 1983

To: Mr. R. J. Thompson
Houston Works

From: K. G. Lautenschlegar

Subject: Industrial Hygiene Insulation Material Identification - Houston Works

SI-83773, Report No. 1 - Final

Two bulk samples were submitted for identification. They were examined by dispersion staining microscopy and X-ray diffraction.

The steam pipe insulation contains chrysotile and the Benzol Tank sample contains amosite.
